Track Couplers

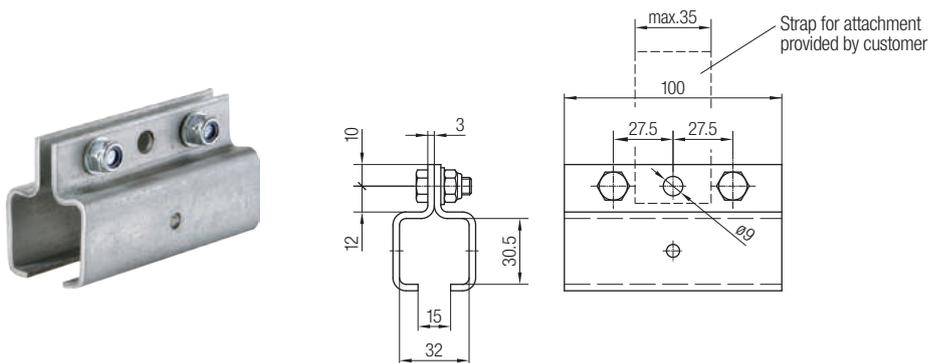

Order No.	Material	Weight [kg]
023210*	galvanized steel	0.28
023410	stainless steel V4A	0.28

*Standard range

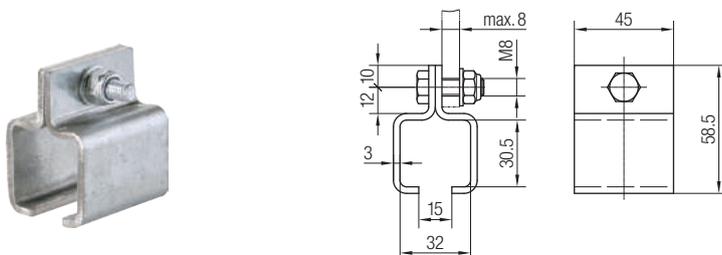

Note: A track coupler must be provided at each track joint.

Track Couplers, Two-Piece

Order No.	Material	Perm. Load [kg]	Weight [kg]
023211	galvanized steel	100	0.48
023411	stainless steel V4A	100	0.48

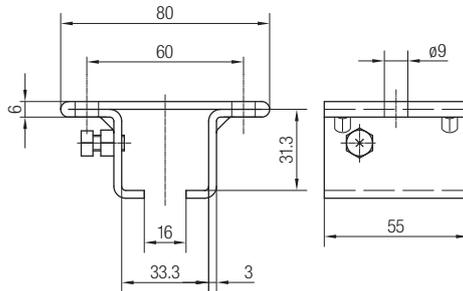

Track Support Brackets, Two-Piece

Order No.	Material	Perm. Load [kg]	Weight [kg]
023247	galvanized steel	100	0.200
023447	stainless steel V4A	100	0.200

C-Rails and Accessories Program 0230

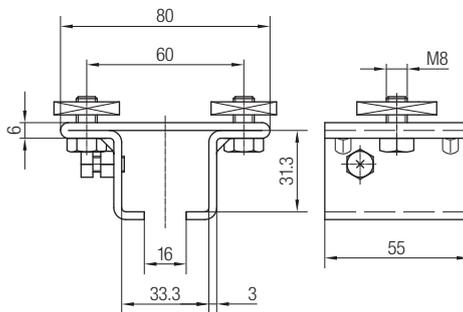

Track Support Bracket, One-Piece, for Ceiling Attachment

Order No. 023225

- Material: galvanized steel
- Perm. load: 160 kg
- Weight: 0.25 kg

Track Support Bracket, One-Piece, with Square Nut for Attachment to Support Arms

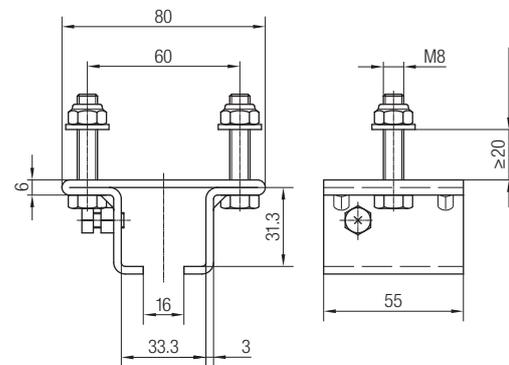

Order No. 023226*

- Material: galvanized steel
- Perm. load: 160 kg
- Suitable for support arm type: 020185, 020186, 020275, 020276
- Weight: 0.32 kg

* Standard range

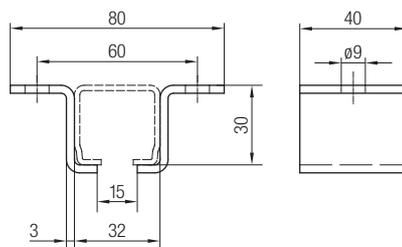

Track Support Bracket, One-Piece, for Attachment to Existing Steel Structure

Order No. 023227

- Material: galvanized steel
- Perm. load: 160 kg
- Weight: 0.30 kg

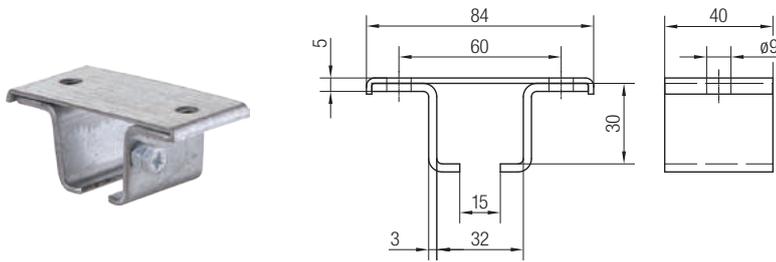

Track Support Brackets, Two-Piece, for Ceiling Attachment

Order No.	Material	Perm. Load [kg]	Weight [kg]
023221	galvanized steel	63	0.10
023421	stainless steel V4A	63	0.10

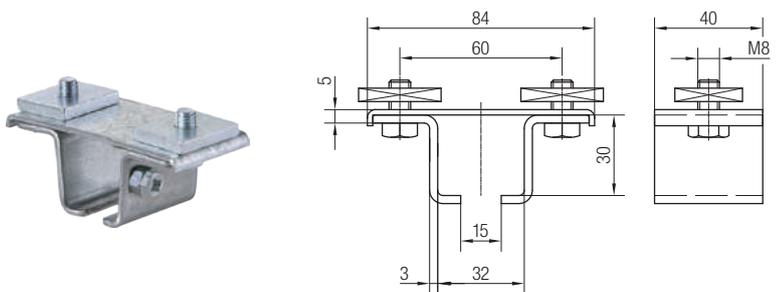

C-Rails and Accessories Program 0230

Track Support Brackets, Three-Piece, for Ceiling Attachment

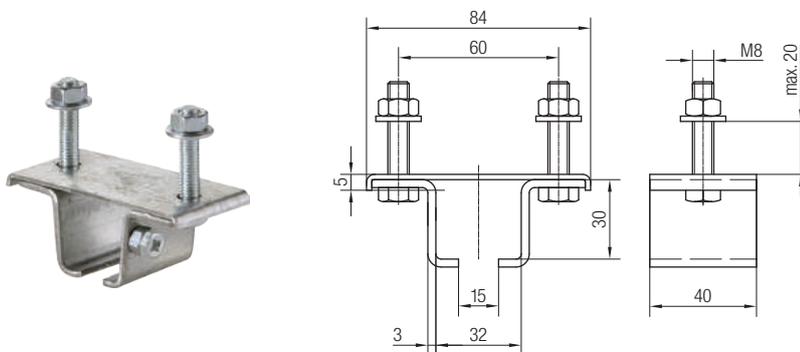

Order No.	Type	Material	Perm. Load [kg]	Weight [kg]
023220	without locking screw	galvanized steel	63	0.16
023220-1	with locking screw			0.17

023422-1	with locking screw				0.25

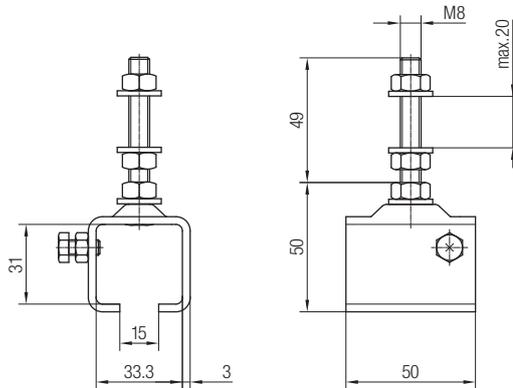

Track Support Brackets, Three-Piece, for Attachment to the Existing Steel Structure

Order No.	Type	Material	Perm. Load [kg]	Weight [kg]
023223	without locking screw	galvanized steel	63	0.20
023223-1	with locking screw			0.21
023423	without locking screw	stainless steel V4A	63	0.20
023423-1	with locking screw			0.21

C-Rails and Accessories Program 0230

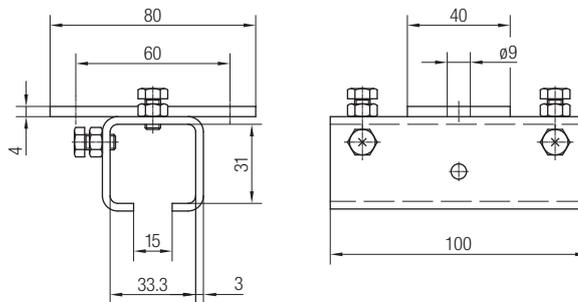

Track Support Bracket for Attachment to the Existing Steel Structure

Order No. 023231

- Material: galvanized steel
- Perm. load: 63 kg
- Weight: 0.20 kg

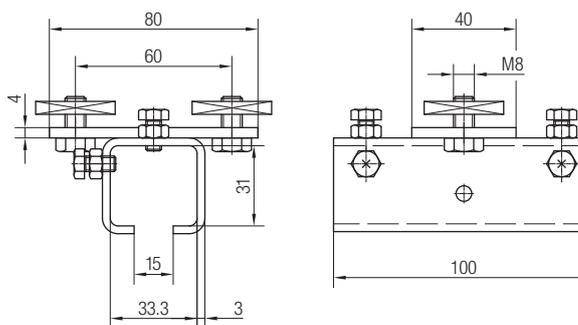

Track Support Bracket and Coupler, One-Piece, for Ceiling Attachment

Order No. 023228

- Material: galvanized steel
- Perm. load: 160 kg
- Weight: 0.36 kg

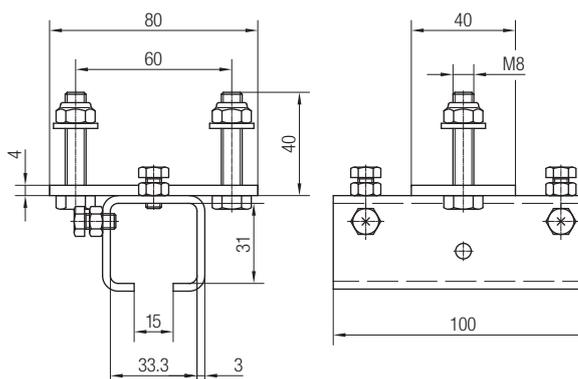

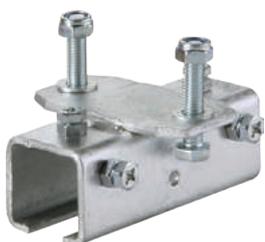

Track Support Bracket and Coupler, One-Piece with Square Nut for Attachment to Support Arms

Order No. 023229

- Material: galvanized steel
- Perm. load: 160 kg
- Suitable for support arm type: 020185, 020186, 020275, 020276
- Weight: 0.44 kg

Track Support Bracket and Coupler, One-Piece for Attachment to the Existing Steel Structure

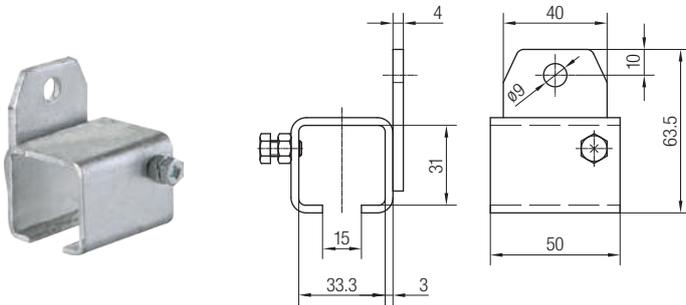

Order No. 023230

- Material: galvanized steel
- Perm. load: 160 kg
- Weight: 0.40 kg

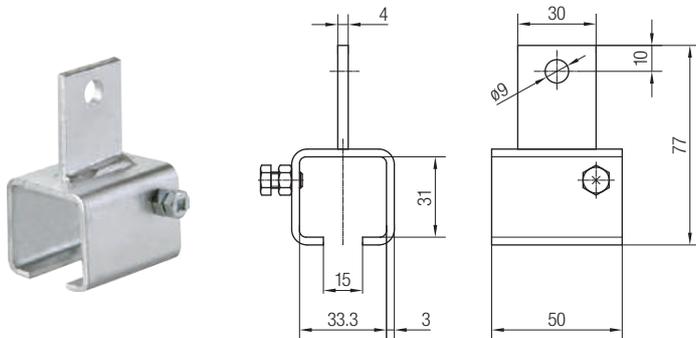

C-Rails and Accessories

C-Rails and Accessories Program 0230

End Stop 30x24

- Order No. 023215***
- Material: galvanized steel
 - Weight: 0.06 kg

* Standard range

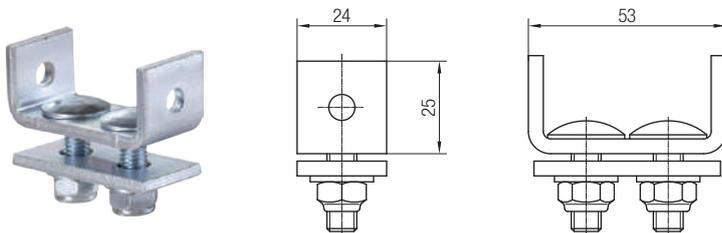

End Stop with Rubber Buffer

- Order No. 023218***
- Material: galvanized steel, rubber buffer
 - Weight: 0.15 kg

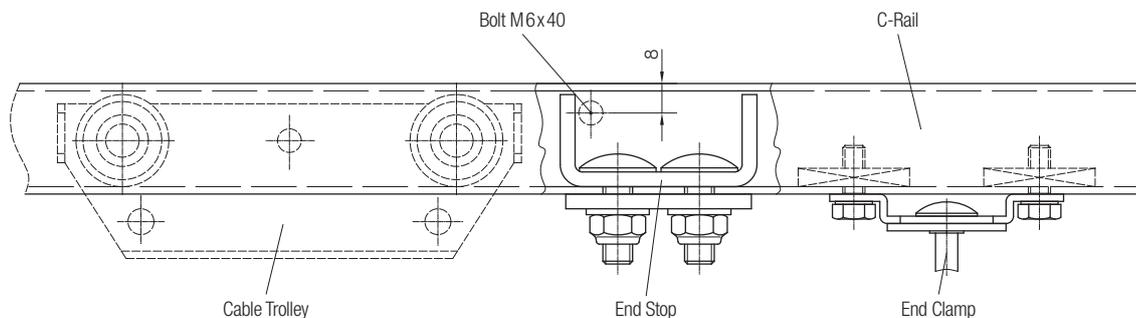

* Standard range

End Stop without Rubber Buffer

Order No.	Material	Weight [kg]
023219	galvanized steel	0.13
023419	stainless steel V4A	0.13

Application Example for End Stop Assembly

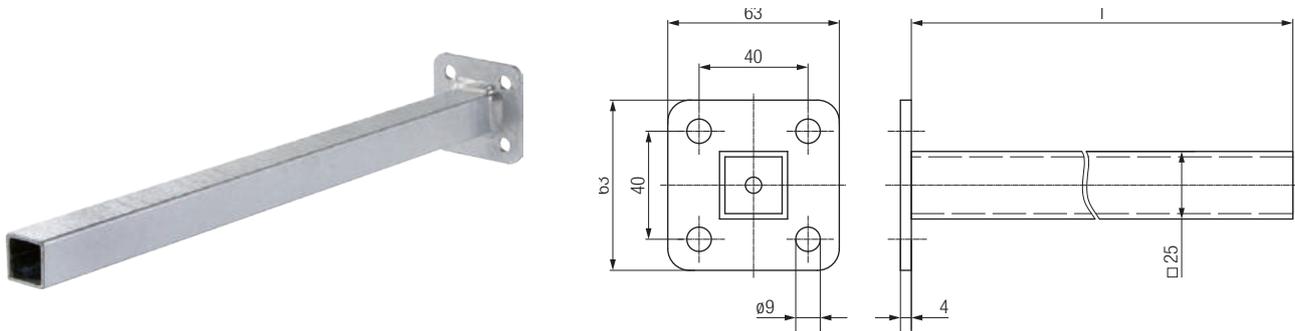

Notes

The end stop is fixed in the C-rail between the end clamp and the cable trolley. This helps to prevent cable trolleys running into the end clamp.

For control supply systems with manually driven ideal control trolleys an end stop mounted at the end of the C-rail prevents the ideal control trolley from travelling out of the rail.

C-Rails and Accessories Program 0230

Roller type

- (1) Plastic roller and plastic friction bearing
- (2) Plastic roller and bronze friction bearing
- (3) Ball bearing, galvanized

*Standard range

Cable Trolleys for Flat Cables Program 0230

Steel Cable Trolleys with Plastic Cable Support

Technical details

- Trolley body: galvanized steel
- Cable supports: plastic
- Hardware: galvanized steel
- Standard rollers: ball bearings, galvanized with ZZ-sealing
- Temperature range: -30°C to +80°C
- Stainless steel rollers: ball bearing, V4A with 2RS-sealing
- Temperature range stainless steel/plastic, acid-resistant: -10°C to +80°C

Note

Suitable for cable clips: 020131-16, 020131-25, 020131-36

Cable Trolleys and Accessories for Traversing Program 0230

Transfer Guide for C-Rail 023200

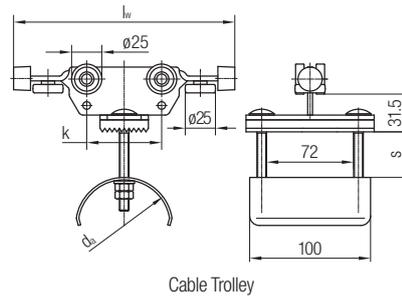

Order No. 023312

- Material: galvanized steel
- Weight: 0.50 kg

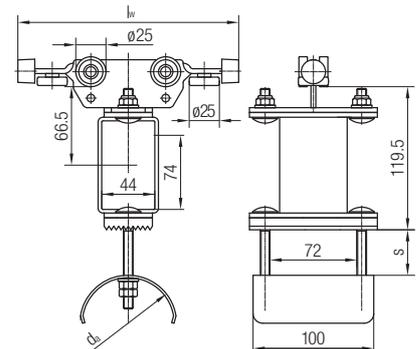

Notes

- Two transfer guides must be mounted at the transfer point with the inlet openings against each other
- The distance "s" must not exceed 15 mm
- Vertical deflection max. 1.5 mm
- Horizontal deflection max. 2.0 mm
- All cable trolleys, that pass this transition point must be provided with 3, the towing trolley with 4 pairs of rollers
- Cable trolleys that do not pass this transition point can be used in standard design
- The transfer guide can only be used in combination with the C-rail 023200

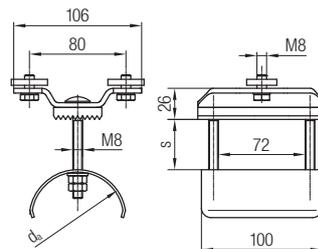

Cable Trolleys with Horizontal Guide Rollers for Applications with Increased Horizontal Forces

Cable Trolley

Towing Trolley

End Clamp

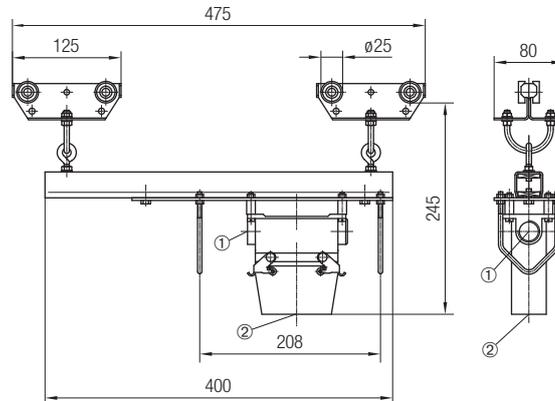

Technical details

- Trolley body: galvanized steel
- Cable supports: galvanized steel
- Hardware: galvanized steel
- Standard rollers: ball bearings, galvanized with ZZ-sealing
- Temperature range: -30°C to +80°C

Determining the Support Distance for C-Rail Program 0230

Technical Data / Calculation Assumptions

The required support distance of the C-rail can be determined using the diagram below.
The following calculation assumptions have been taken into consideration:

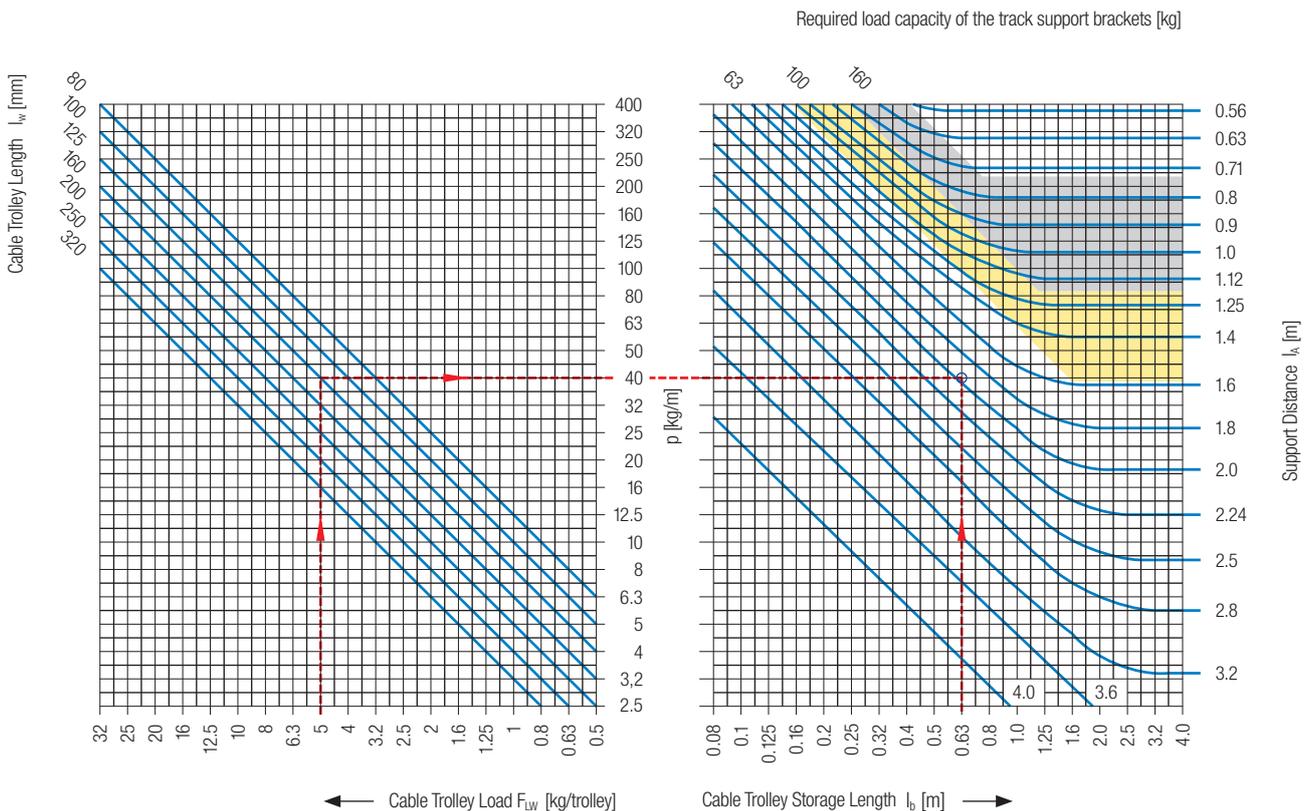

1. Simply-supported beam, uniform load symmetrical to middle of the beam
2. The load of one trolley F_{LW} [kg/trolley] is distributed over trolley length l_w as a uniform load p [kg/m]
3. Total length of the uniform load results from the cable trolley storage length l_b [m] of all trolleys side by side
4. $\sigma_{b_{Zul}} = 100 \text{ N/mm}^2$, without consideration of the lower flange stress
5. $\sigma_V \leq 160 \text{ N/mm}^2$, reference stress from bending stress and lower flange stress
6. $f = l_b/250$ permissible deflection from the load and net weight of the rail
7. As track support bracket load the load of a field symmetrical to the mounting (bracket) is assumed

Example:

Given:

F_{LW} = Cable Trolley Load: 5 kg (X axis value on the left-hand graph below)
 l_w = Cable Trolley Length: 125 mm (blue line on the left graph)
 Z = Overall number of Cable Trolleys: 5
 l_b = Cable Trolley Storage Length: 0.625 m (X axis on the right-hand graph below)
 $(m) = Z \times l_w / 1000$

Load Diagram for C-Rail 30 x 32 x 2 (023200 / 023400 / 023404)

Solution for C-Rail 30 x 32 x 2

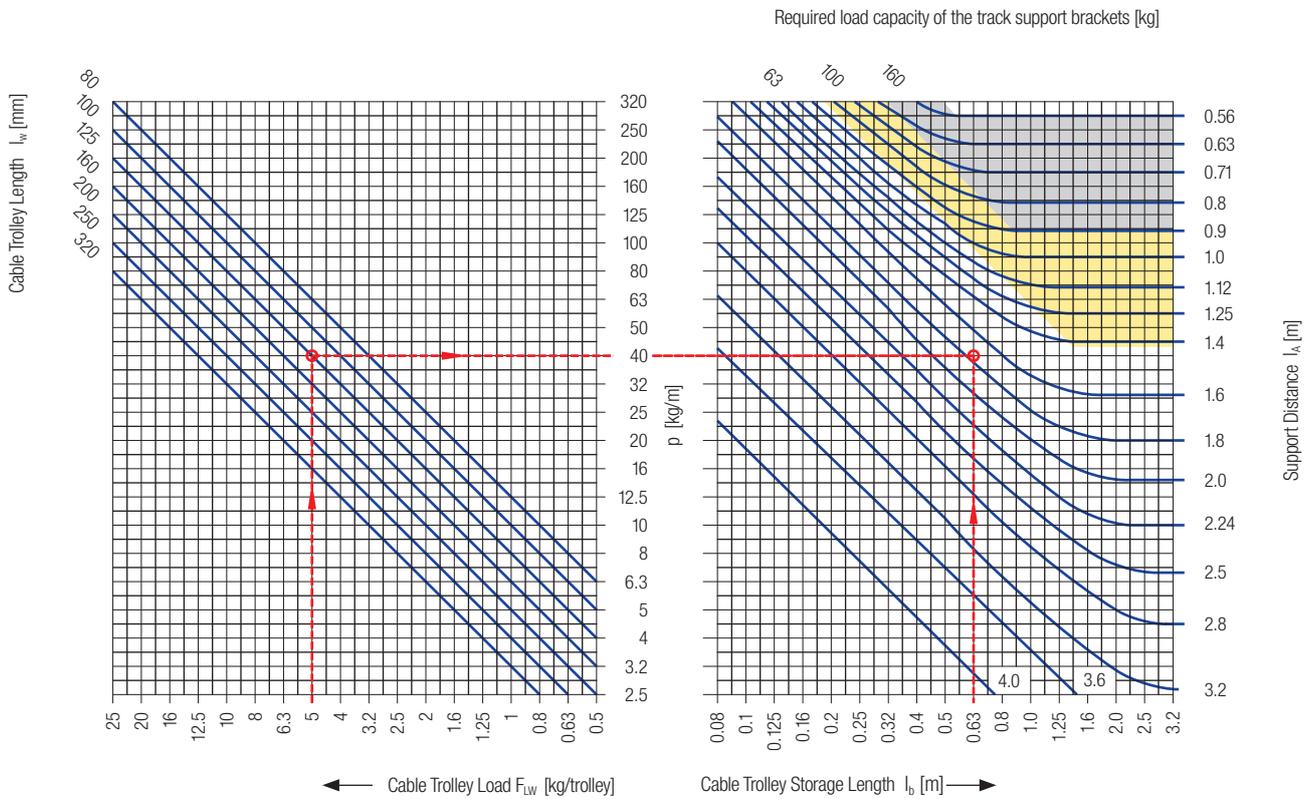

From diagram:

Required Support Distance $l_a = 1.95 \text{ m}$

Required Load Capacity of the track support brackets = 63 kg

Helpful Hints

Load Diagram for C-Rail 30 x 32 x 1.5 (023201)

Solution for C-Rail 30 x 32 x 1.5

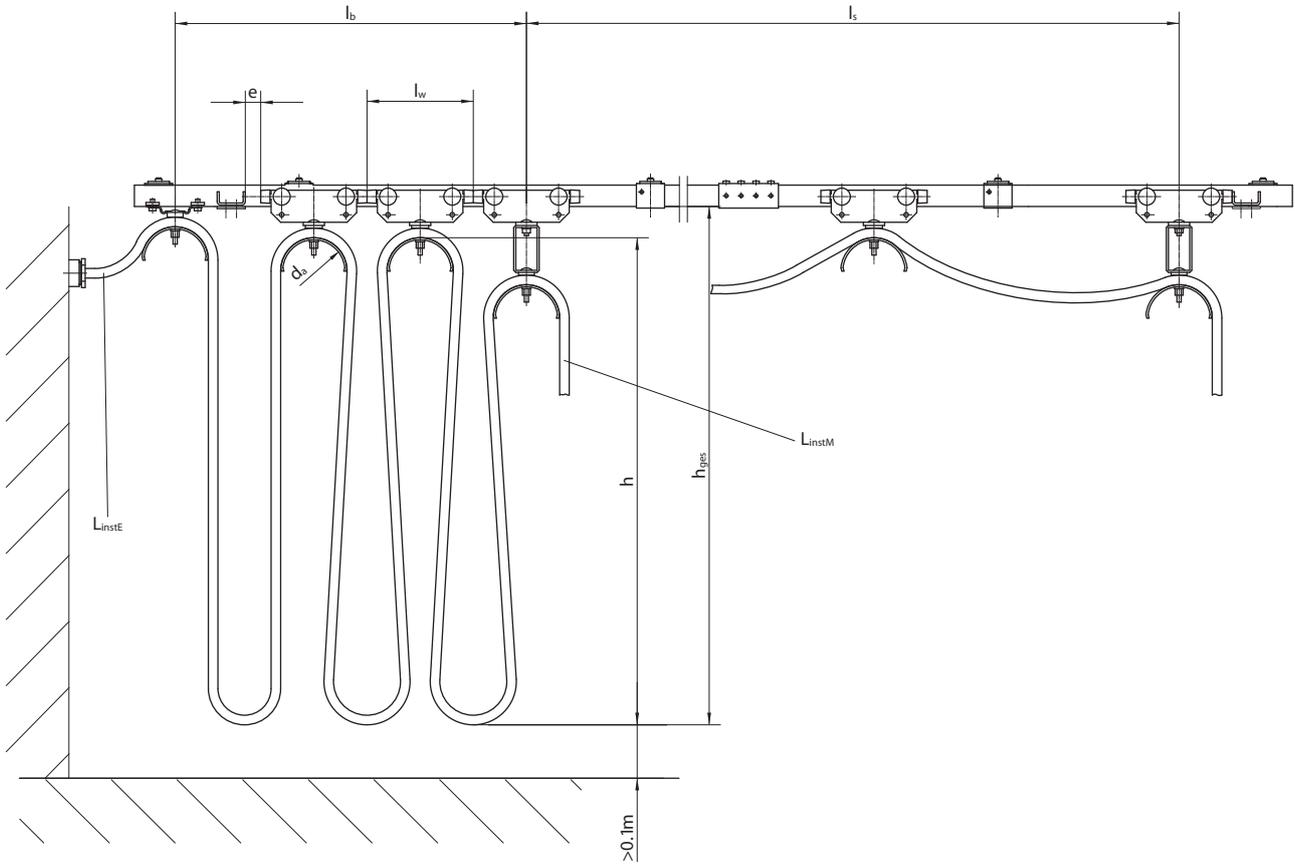

From diagram:

Required Support Distance $l_A = 1.75$ m

Required Load Capacity of the track support brackets = 63 kg

Helpful Hints

Technical Data

Formulas to Determine the Number of Loops, Cable Length and Loop Depth

Number of loops:

$$n = \frac{f \cdot (l_s + e)}{2 \cdot h + 1.25 \cdot d_a - f \cdot l_w}$$

Storage length:

$$l_b \approx n \cdot l_w + e \quad [\text{m}]$$

System cable length:

$$L_{\text{Syst}} = f \cdot (l_s + l_b) \quad [\text{m}]$$

Total cable length:

$$L_{\text{Best}} = L_{\text{Syst}} + L_{\text{instE}} + L_{\text{instM}} \quad [\text{m}]$$

Loop length:

$$L_{\text{Schl}} = \frac{L_{\text{Syst}}}{n} \quad [\text{m}]$$

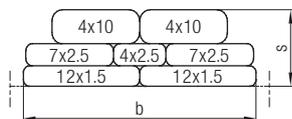

Loop depth:

$$h = \frac{L_{\text{Schl}}}{2} - 0.63 \cdot d_a \quad [\text{m}]$$

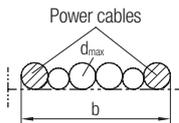

- d_a [m] = cable support diameter
- e [m] = free space in storage area (recommendation ≥ 0.1 m)
- f = recommended cable factor (see table page 46)
- h [m] = loop depth (measured from top edge of cable support)
- h_{ges} [m] = loop depth (measured from lower edge of track profile)
- l_b [m] = storage length incl. free space
- l_s [m] = travel distance
- l_w [m] = cable trolley length
- L_{Best} [m] = total cable length
- L_{instE} [m] = installation length, end clamp side
- L_{instM} [m] = installation length, towing side
- L_{Schl} [m] = cable length per loop
- L_{Syst} [m] = required cable length (measured from mid of end clamp to mid of towing trolley or towing clamp)
- n = number of loops

Helpful Hints

Definition of the cable arrangement and cable trolley selection

Example for flat cable trolleys

Example for round cable trolleys

1. Formula for calculating the approximate load per trolley F_{LW}

$$F_{LW} \approx 2 \cdot h \cdot G_L \quad [\text{kg}]$$

G_L [kg/m] = weight of the cable package

2. Selection of the cable trolley type
3. Required cable support diameter based upon minimum bending radius of the cables
4. Select cable support width b_2 to accommodate the cable package width
5. Determine length of trolley l_w

For round cables:

$$l_w \geq d_a + 2 \cdot d_{\max} + 10 \quad [\text{mm}]$$

For flat cables:

$$l_w \geq d_a + 2 \cdot s + 10 \quad [\text{mm}]$$

Instruction help how to build the cable packet, please check MAL0200-0003

Cable Factors

Travel Speed v [m/min]	Cable Factor f at h [m]				
	< 0.8	0.8 - 1.2	1.3 - 2	2.1 - 3.2	3.3 - 5
< 32	1.10	1.10	1.10	1.10	1.10
32 - 040	1.15	1.10	1.10	1.10	1.10
41 - 050	1.20	1.15	1.10	1.10	1.10
51 - 063	1.25	1.20	1.15	1.10	1.10
64 - 080	-	1.25	1.20	1.15	1.10
81 - 100	-	-	1.25	1.20	1.15
101 - 120	-	-	-	1.25	1.20

Depending on the operating conditions the cables must be installed with an additional cable length. The additional length is calculated

by taking into account the cable factor f . We recommend to select the cable factor according to above table.

For values outside the gray area, please contact us directly. Special precautions might be required in those cases under extreme operating conditions, such as the installation of shock cords.

Plastic Roller with Bronze Friction Bearing	12.5	10.0	8.0	-	-
Plastic Roller with Plastic Friction Bearing	10.0	8.0	6.3	-	-

The lifetime of the rollers depends on the load (Hertzian stress) and the frequency of operation.

The proper selection, based on travel speed, average running time per day (based on one year) and permissible load of the trolleys with various roller types, can be made by using the above table.

Your Applications – our Solutions

Festoon Systems from Conductix-Wampfler represent only one of the many solutions made possible by the broad spectrum of Conductix-Wampfler components for the transport of energy, data and fluid media. The solutions we deliver for your applications are based on your specific requirements. In many cases, a combination of several different Conductix-Wampfler systems can prove advantageous. You can count on all of Conductix-Wampfler's Business Units for hands-on engineering support – coupled with the perfect solution to meet your energy management and control needs.

Festoon systems

It's hard to imagine Conductix-Wampfler cable trolleys not being used in virtually every industrial application. They're reliable and robust and available in an enormous variety of dimensions and designs.

Conductor rails

Whether they're enclosed conductor rails or expandable single-pole systems, the proven conductor rails by Conductix-Wampfler reliably move people and material.

Non-insulated conductor rails

Extremely robust, non-insulated conductor rails with copper heads or stainless steel surfaces provide the ideal basis for rough applications, for example in steel mills or shipyards.

Slip ring assemblies

Whenever things are really "moving in circles", the proven slip ring assemblies by Conductix-Wampfler ensure the flawless transfer of energy and data. Here, everything revolves around flexibility and reliability!

Motorized Cable & Hose Reels

Motorized reels by Conductix-Wampfler hold their own wherever energy, data, media and fluids have to cover the most diverse distances within a short amount of time – in all directions, fast and safe.

Spring Cable & Hose Reels

With their robust and efficient design Spring Cable and Hose Reels from Conductix-Wampfler are unbeatably reliable in supplying energy, signals, data and fluids to a vast range of tools, cranes and vehicles.

Inductive Power Transfer IPT®

The no-contact system for transferring energy and data. For all tasks that depend on high speeds and absolute resistance to wear.

Retractors and Balancers

Our wide range of high reliable retractors and balancers remove the load from your shoulders and allow you to reach top productivity.

Energy guiding chains

The "Jack of all trades" when it comes to transferring energy, data, air and fluid hoses. With their wide range, these energy guiding chains are the ideal solution for many industrial applications.

Jib booms

Complete with tool transporters, reels, or an entire media supply system – here, safety and flexibility are key to the completion of difficult tasks.

Conveyor systems

Whether manual, semiautomatic or with Power & Free – flexibility is achieved with full customization concerning layout and location.
