Description

Conductix-Wampfler Multipole Conductor Rail Program 0831

The Conductix-Wampfler multipole conductor rail program 0831 is protected against direct contact and designed as a flat profile. This system is recommended for high storage bays, cranes, transport trolleys and special machinery. The Conductix-Wampfler multipole conductor rail can be used for energy and data transmission on indoor and weather protected outdoor applications with straight track layouts.

- 3, 4 and 5-poles
- 10 - 125A (100% Duty cycle)
- protected against direct contact
- little space consumption / combinable with ProShell Support Profile
- installation vertical and horizontal
- quick installation due to connector plug-in system and universal steel clamp fasteners

CONDUCTOR RAILS

The conductor rail poles are enclosed in high-quality plastic profiles in 3, 4 and 5 pole type. There are different versions for a current load from 10 up to 125A nominal current. The phase spacing of the multipole profiles is 18 mm. With a combination of different multipole profiles every number of multipole conductor systems is possible.

The standard length is 4000 mm, shorter lengths are available. It is possible to combine different conductor rail types within the compact profiles. Datametal conductor rails will be used for a reliable data transmission. In special cases please ask for assistance.

SUPPORT / HANGER CLAMPS

The conductor rail segments have to be fastened at least at 2 points. The support distance is max. 1000 mm. The plastic hanger clamps can be mounted on customers supporting beams or runway profiles as well as on Conductix-Wampfler support arms. With universal steel clamp fasteners they can be mounted on the beam flanges. The multipole conductor rail will be snapped into the hanger clamps which are designed as sliding hanger clamps.

SUPPORT / ANCHOR CLAMPS

To control the expansion an anchor clamp will be installed, which holds the multipole conductor rail in position in the hanger clamp, due to an additional screw. The anchor clamp will preferably be located in the middle of an installation.

POWER FEED

Power feeds are available as end feed or in-line feed up to 35 mm² cross section, as well as flat centre feed up to 35 mm² cross section. In-line feeds can be installed at each rail joint. The power feeds are rail segments with a length of 1000 mm, except for the end feeds.

EXPANSION JOINTS

Expansion joints are used as expansion compensators in systems which are exceeding a total length of 200 m (see page 13/14). In case you need expansion joints please ask for assistance.

RAIL CONNECTORS

The rail segments are connected with a special connector plug-in system. The rail connector is already included at the end of each rail segment.

PICK-UP GUIDES FOR TRANSFER POINTS

A reduced travel speed will increase the lifetime. A limit of max. 85 m/min is recommended.

INSTALLATION

For detailed information please refer to our installation instruction (MV0831-0006-E).

Critical installation situations, optional locks / safety ropes are available.

Current Collectors

The current collector unit with or without terminal box is installed on the mobile power consumer. It consists of fully insulated current collectors which are moveable in all directions. The earth collector is marked green/yellow and not interchangeable with a phase collector. Collector shoes can be checked without disassembling and can be replaced quick and easily. In special cases please ask for assistance.

	Current Collectors		Current Collector Units

	083118-4x4x12	083118-4x4x11	4	90.5	8.402
	083118-4x5x12	083118-4x5x11	5	108.5	10.504

* Standard range

Short lengths (SAP CONFIG 3129410)

Order Example: Multipole conductor rail program 0831
steel 32 A
4-poles
for power supply
4 m long

Note

Plastic and metal (conductive material) have a different expansion behavior. To compensate for rail- and insulation at the reference temperature of 20° C are of different lengths (2 mm shorter rail, as insulation).

A gap in the assembled state, between the rails, of 2 to max. 8 mm. is possible, depending on temperature.
For applications below + 5 ° C (cooling applications), there are special rails are available. Please contact us.

Power Feeds

End Feed complete with pre-mounted Connector and Terminal Box (083153-...)

Technical details

- Connection cable max. 35 mm²
- Suitable for all types of multipole conductor rails
- Use cable lugs for threaded connection M8 (not included)

083171-5*	5	108.5	0.050

* Standard range

For Transfer Points (083172-...)

Technical details

- The end cap for transfer points centres the current collector and compensates horizontal and vertical deflections of max. ± 3 mm.
- Not usable in combination with current collector 083102

Part No.	Poles	B [mm]	Weight [kg]
083172-3	3	77	0.160
083172-4	4	95	0.200
083172-5	5	113	0.240

Air Gap Insulating Sections Pick-up Guides

Air Gap Insulating Sections (083195-...)

Technical details

- Not usable in combination with current collector 083102

Part No.	Poles	A [mm]	Weight [kg]
083195-3	3	77	0.342
083195-4	4	95	0.418
083195-5	5	113	0.494

Pick-up Guides for Transfer Points (083181-....)

Technical details

- Use pick-up guides only with "pick-up guide current collector".
- The pick-up guide compensates vertical or horizontal misalignments up to ± 15 mm. Assembly tolerances below ± 3 mm are recommended.

Guides: to be fixed to the substructure and represent a fixed point. A „floating“ use is not recommended.

Part No.	Poles	A [mm]	B [mm]	C [mm]	Weight [kg]
083181-3x25	3	18	54	142	0.160
083181-4x25	4	36	72	160	0.200
083181-5x25	5	54	90	178	0.240

Expansion Element

Complete with pre-mounted Connector (083161-...)

Note
Copper-Expansion Element can be used for all copper and steel conductor rails up to 125 A

1) Hanger clamps to be ordered separately! Connecting cables have to be installed flexible.

Expansion Elements with PE Part No.	without PE Part No.	Poles	Material	Weight [kg]
083161-2x6372	083161-2x6371	3	Copper	5.610
083161-2x6472	083161-2x6471	4		7.480
083161-2x6572	083161-2x6571	5		9.350
083161-2x2382	083161-2x2381	3	Datametal	2.810
083161-2x2482	083161-2x2481	4		3.720
083161-2x2582	083161-2x2581	5		4.680

See hints page 14 (dimensioning / quantity).

How to select Expansion Elements

Expansion elements are installed in systems exceeding a total system length of 200 m as shown below, if the ambient temperature variation (ΔT) is more than 20°C during operation. Expansion joints are not required if the total system length is shorter than 200 m or if the ambient temperature variation (ΔT) is below 20°C during operation. An anchor clamp in the middle of the system halves the expansion travel and eases positioning of the hanger clamps. Pay attention to the distance between the hanger clamps and the rail connectors (System sketch, page 25).

Determination of System Length L:

System length L:

$$L = 2 \cdot L_E + m \cdot a$$

Number of expansion elements:

$$m = \frac{L - 200}{a} \text{ (rounded)}$$

m = number of system part lengths with one expansion element

—X— Anchor clamp
— Expansion element

Expansion Element

Determination Quantity of Expansion Elements

ΔT [°C]	a [m] ¹⁾	System length [m]

1) number of needed expansion elements

Diagram to set the Air Gap of Expansion Elements

Air gap to be set 0 - 50 mm during system installation.

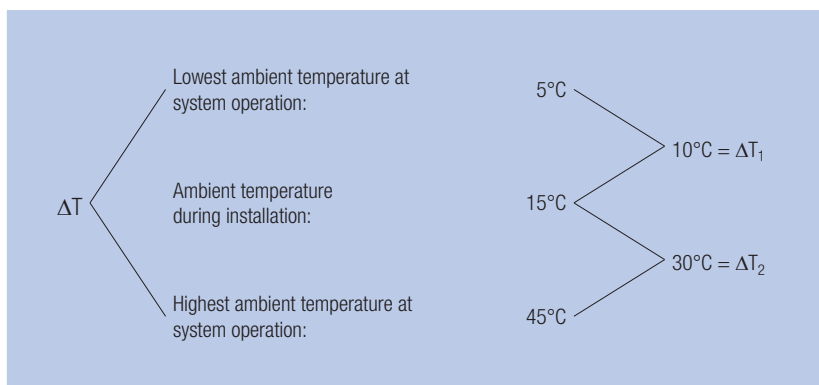

How to use the diagram (Example below):

1. Draw a connection line from min. to max. ambient temperature t_A (e.g. 5°C to 45°C).
2. Mark the ambient temperature during installation t_m (horizontal dotted line).
3. Draw a line from the intersection vertically down and read the air gap to adjust.

Technical details

- Highest ambient temp.: 55°C
- Lowest ambient temp.: 0 to -18°C; depends on the type of conductor rail. Special designs for deeper temperatures on request.

Example

Air gap read from diagram: ~ 38 mm

Air gap calculated:

$$s = 50 \frac{\Delta T_2}{\Delta T_1 + \Delta T_2} = 38 \text{ mm}$$

Current Collectors with Accessories

Current Collectors (083102-...)

Technical details

- Collector shoe material: copper graphite
- Max. wearing height: 5 mm
- Contact pressure: 5 N
- Deflection (horizontal/vertical): ± 30 mm
- Assembly tolerances below ± 10 mm recommended
- Connection cables (highly flexible) to be ordered separately (see page 17)
- The current collectors are not for use with program 0811!
- Do not use in combination with air gap insulation 083195 and transfer points 083172

Type	with Phase (PH) Part No.	with Earth (PE) Part No.	I max. ¹⁾ [A]	Weight [kg]

Your Applications - our Solutions!

Conductor Rails by Conductix-Wampfler represent only one of the many solutions made possible by the broad spectrum of Conductix-Wampfler components for the transport of energy, data and fluid media. The solutions we deliver for your applications are based on your specific requirements. In many cases, a combination of several different Conductix-Wampfler systems can prove advantageous. You can count on all of Conductix-Wampfler's Business Units for hands-on engineering support - coupled with the perfect solution to meet your energy management and control needs.

Cable reels

Motorized reels and spring reels by Conductix-Wampfler hold their own wherever energy, data and media have to cover the most diverse distances within a short amount of time - in all directions, fast and safe.

Festoon systems

It's hard to imagine Conductix-Wampfler cable trolleys not being used in virtually every industrial application. They're reliable and robust and available in an enormous variety of dimensions and designs.

Conductor rails

Whether they're enclosed conductor rails or expandable single-pole systems, the proven conductor rails by Conductix-Wampfler reliably move people and material.

Non-insulated conductor rails

Extremely robust, non-insulated conductor rails with copper heads or stainless steel surfaces provide the ideal basis for rough applications, for example in steel mills or shipyards.

Energy guiding chains

The "Jack of all trades" when it comes to transferring energy, data, air and fluid hoses. With their wide range, these energy guiding chains are the ideal solution for many industrial applications.

Slip ring assemblies

Whenever things are really "moving in circles", the proven slip ring assemblies by Conductix-Wampfler ensure the flawless transfer of energy and data. Here, everything revolves around flexibility and reliability!

Inductive Power Transfer IPT®

The no-contact system for transferring energy and data. For all tasks that depend on high speeds and absolute resistance to wear.

Reels, retractors and balancers

Whether for hoses or cables, as classical reels or high-precision positioning aids for tools, our range of reels and spring balancers take the load off your shoulders.

Jib boom

Complete with tool transporters, reels, or an entire media supply system - here, safety and flexibility are key to the completion of difficult tasks.

Conveyor systems

Whether manual, semiautomatic or with Power & Free – flexibility is achieved with full customization concerning layout and location.

www.conductix.com

Conductix-Wampfler

has just one critical mission:
To provide you with energy and
data transmission systems that
will keep your operations up
and running 24/7/365.
